WHAT IS THE NX-CONNECT™?

The **NX-CONNECT™** is a software package that allows users to remotely interact (monitor and access) with their Nitrex heat treating systems equipped with **NPC™ – Nitrex Process Controller**. It can link all such systems to a single interface and allow users from within a plant or from dispersed facilities around the world to access, create, modify, and share process parameters within a local area network (LAN) or through the internet, using either a VPN or some other remote connection solution (e.g. TeamViewer™).

> **The NX-CONNECT™ can monitor and accesses your Nitrex heat treating systems within or outside your plant.**

WHAT IS INCLUDED?

The Software Package consists of one (1) equipment communication channel license and three (3) user licenses, however additional licenses can be purchased.
An equipment communication channel license is required for each connection to an **NPC™ – Nitrex Process Controller** while each user of the **NX-CONNECT™** Software requires a "user license".

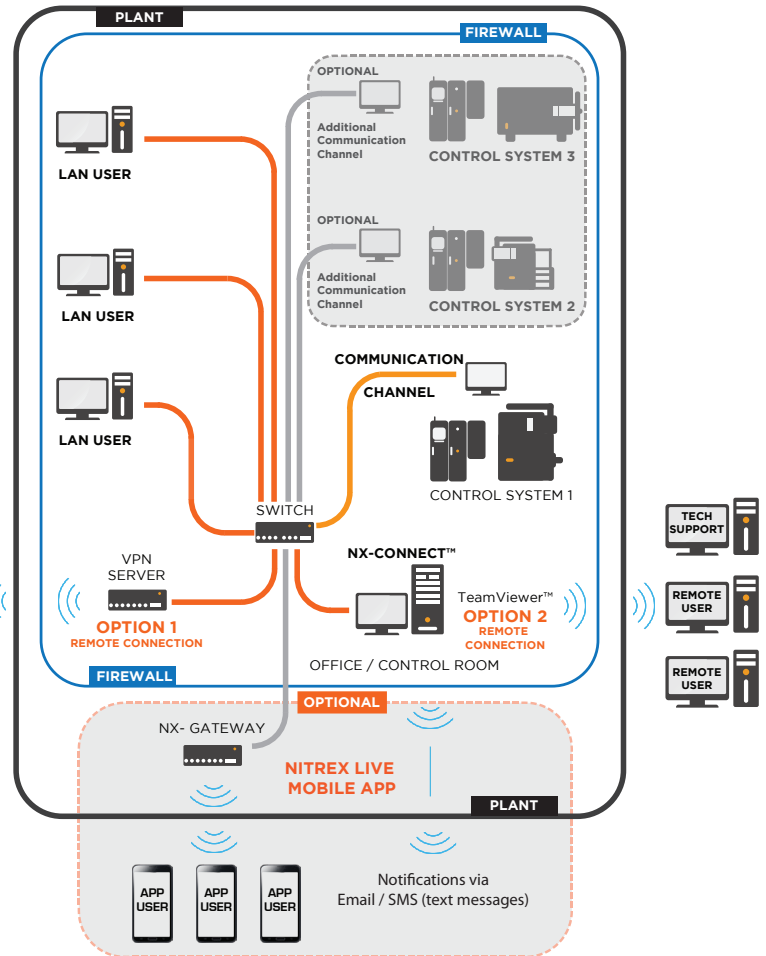

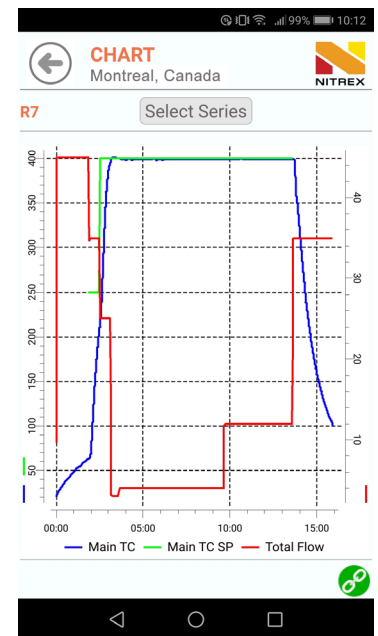

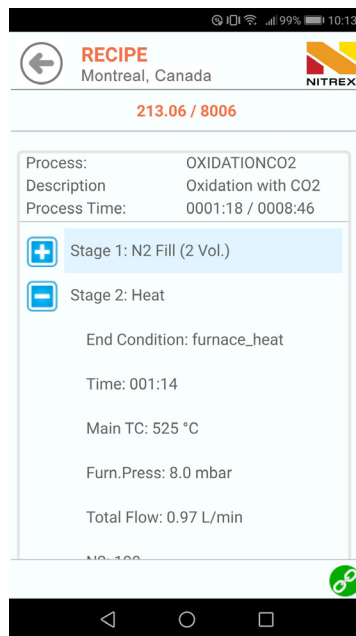

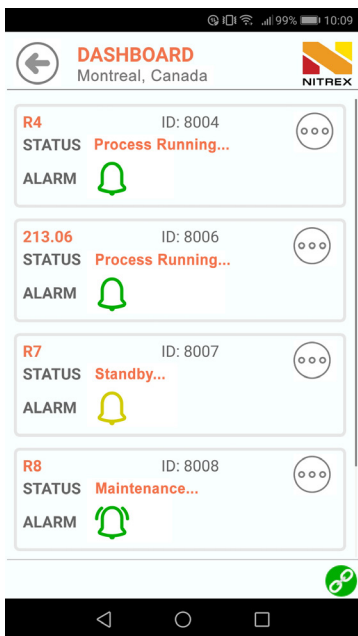

Connecting to NX-CONNECT™ within and/or outside a LAN

> **The optional Nitrex Live™ app allows you to access your Nitrex systems on your smartphone or tablet**

FEATURES

▶ Access Nitrex heat treating systems equipped with **NPC™*** and connected to the **NX-CONNECT™****
▶ View and acknowledge alarms
▶ Modify alarm/warning levels per recipe-step
▶ Enable / disable alarms per recipe-step
▶ Abort/resume jobs
▶ Remotely start jobs (optional)
▶ View/print LOG reports
▶ View/print real time graphs
▶ Modify the Process Library
▶ Modify parameters of currently running jobs
▶ Mirror/synchronize files from all controllers with a specified remote folder on the customer's network
▶ Create new users/modify user access levels
▶ Receive alarms, emergencies, and job status notifications via text messages (SMS) and/or email***
▶ Access via an Android Tablet/iPad***

* must be loaded with the latest NPC™ firmware
** login and permissions may be required to access different functions
*** available only with Nitrex Live App

NITREX LIVE™ APP
OPTIONAL REMOTE ACCESS APPLICATION

Access your Nitrex heat treating system(s) from anywhere with NITREX LIVE™. This application provides a real-time overview of your Nitrex heat treating furnace(s), letting you view alarms and alarm status at a glance, current running recipe(s), and a time-series graph based on user-selected data variables of a running process. During the initial setup, the app requires that you authenticate yourself with the NX-CONNECT™ logon credentials in order to access your Nitrex heat treating system(s).

TRY THE DEMO VERSION!

The Nitrex Live™ app (demo version) is available on the Apple and Google Play Stores. Click on the app store badge below to download the App or scan the QR Code to go directly to the app listing.
