

MEET ISO, CQI OR OTHER AUDIT PROGRAM

This Innovating In-Field Certification service is designed to meet ISO, CQI-9 or any other audit program requiring Waukee Flo-Meter certification. This service allows Waukee's Flo-Meters to be certified on-site. The Flo-Meter certification is **traceable** to National Institute of Standards and Technology (NIST). Waukee's Certified Technicians will chart the actual flow for each Flo-Meter without the need for Flo-Meter removal, thereby minimizing process downtime.

WAUKEE CERTIFIED TECHNICIANS WILL

- Review Flo-Meter's calibration and certification history as recorded in a Waukee database
- Inspect and clean the Flo-Meter and recommend replacement parts if necessary
- If a Flo-Meter requires repair:
 - Repair the Flo-Meter before Certification.
Note: only a limited number of spare parts will be available with Waukee's technicians
 - If the Flo-Meter cannot be repaired on-site, an appropriate recommendation will be made depending on the problem with the Flo-Meter
- Reassemble the Flo-Meter with new Flo-Meter oil
- Make any Waukee-Tronic and Valve-Tronic/SAV adjustments if Flo-Meter is so equipped
- Connect Waukee Engineering special traceable test metering instrumentation and chart actual flow rate
- Re-verify any electronic setting
- Follow-up with a written report on the Flo-Meter certification
- Record and archive the results on each Flo-meter in a Waukee database

BENEFITS

Most importantly, be assured that your Flo-Meters are providing accurate and repeatable readings, thus improving process quality. Concurrently, independent Flo-Meter certification should satisfy in-house calibration requirements and enhance passing of customer's quality assurance inspection/audit.
